Senior Applications Developer/Project Manager with excellent technical, organizational and communications skills. Fast learner who can easily adapt to new situations. Self-starter who is equipped to deal with multiple projects. Excellent planning and execution skills and able to multitask in a fast-paced deadline oriented environment. Skilled in information architecture, applications development and wireframe development. Friendly, positive, outgoing and energetic.

Experience

Senior Applications Developer/Project Manager, MedStar Health Inc.

January 2001 to Present, Columbia, MD

Duties Include: Ensure that all marketing communication efforts work toward the clients overall strategy, goals and objectives while keeping projects on schedule, within budget and within scope. Regular consultations with clients concerning software, creating new applications and testing newly installed programs to verify functionality. Writing reports on team progress and presenting those reports to upper executive committees. Review budgetary issues and assist on negotiating contracts with vendors. Ensure company policies are being followed and counsel employees as needed. Other responsibilities include handling of all developmental aspects of a project, and act as a mentor and guide to subordinates in carrying out application developmental stages. Conducting of progress meetings and interfacing with other departments during the development lifecycle. Organize and carry out quality assurance testing for all new web projects by organizing team members for the testing effort and getting the errors fixed in a timely manner.

Web and Multimedia Developer, Cabezon Group

August 2011 to Present, Ellicott City, MD

Duties Include: Implementation of the FEMA Fire Grant E-Learning site. Developing and implementing a custom look and feel to the FEMA site. Other responsibilities include programming of the enhanced Flash tutorial section of the Fire Grant E-Learning site. I conducted code review and implemented peer review comments prior to go-live.

Enterprise Architect, Baltimore City Government, Board of Health.

June 2009 to September 2009, Baltimore, MD

Directed a large IT team in the development of their internet web site. Designed and implemented the Board of Health's public website. Primary contact and liaison for all client matters, while overseeing creative and technical staff. Designed a Content Management System (CMS) for the board to use to modify and update content for their site. Supervised marketing strategies and SEO for launch of web site.

Senior Web Developer/Project Manager, Michael Blum Associates Inc.

July 1999 to January 2001, Bel Air, MD

Responsibilities included designing and implementing all client internet sites using HTML, Javascript, CSS and DHTML. Other responsibilities included search engine placement and optimization, marketing campaigns and collateral work. Project Managed a 2 developer/designer team on all projects. A company of note we worked with was Becton, Dickinson and Company, BD Biosciences.

Web Designer, Graymar Business Systems

December 1998 to July 1999, Timonium, MD

Designed and developed over 35 websites including seven web applications, five e-commerce websites and seven corporate websites. Managed 19 client accounts, such as Holiday Inn Timonium MD, and established long term relationships resulting in 13 new projects from six existing clients.
